One step from commissioning: the Kurukshetra Elevated Railway Track.

HRIDC was privileged to host Shri Dinesh Chand Deshwal, Commissioner of Railway Safety (Northern Circle), for the statutory safety inspection of the Kurukshetra Elevated Railway Track (Kurukshetra–Narwana section) on 8 July, ahead of its formal inauguration.

Accompanied by Sh. Sukhvinder Singh (IRSEE), Managing Director, HRIDC, Shri Pushpesh Raman Tripathi, Divisional Railway Manager (Delhi Division), Northern Railway, along with other senior railway officers and the project team, the Commissioner assessed the elevated viaduct, permanent way, signalling & telecommunications, overhead electrification, and overall operational readiness.

The CRS authorisation is the final independent clearance before any new railway line carries passengers—a rigorous verification of safety at every level. Reaching this milestone is a tribute to the engineers, workers, and partners behind the project, which will decongest Kurukshetra city and enhance urban mobility.
